EDUCATION

MIT-ADT University ,Pune

- Bachelor of Technology - Computer Engineering

Expected Sep 2026

SKILLS

- **Programming Languages** : C, C++, Python, Java, JavaScript, SQL,HTML,CSS
 - **Libraries/Frameworks** : ReactJS, React Native, NodeJS, ExpressJS, Flask, Web-RTC, Numpy, Pandas, Matplotlib, Tensorflow, Scikit-learn
 - **Tools**: AWS, Docker, Git/Github, Arduino,Linux, mySQL, MongoDB, Google Colab, Cisco Packet Tracer,
-

PROJECTS

Home Seekr

- Created a web application that predicts house prices using machine learning based on user-inputted location and property details. Utilized data processing for accurate predictions and designed an intuitive UI/UX for seamless navigation. Achieved high prediction accuracy through iterative model refinement, showcasing my ability to integrate technical skills with practical application development.

To-Do Application

- Developed a full-stack to-do application using React for the frontend and Node.js for the backend. The application enables users to create, update, and delete tasks efficiently. Implemented RESTful APIs for seamless data handling and integrated a user-friendly interface, enhancing overall user experience and task management efficiency.

Crypto Wallet

- Created a decentralized wallet application utilizing Ethereum smart contracts, enabling users to securely manage their cryptocurrency assets and interact with decentralized applications
-

CERTIFICATIONS

- Python Certification
 - Java Certification
 - Cisco Packet Tracer Certification
-

ACHIEVEMENTS

- Led a team to 9th place out of 427 submissions in Smart India Hackathon (SIH). Challenge: "A multimodal biometric system for employees with geo location."
- Received 25,000 funding from CRiEYA Incubation Center, MIT ADT University. • Led a team in SIH tackling "AI-based tool for preliminary diagnosis of Dermatological Manifestations."
